## Setter tray HD B14839

Stackable high density setter tray  
for increased setting capacity

### Features & benefits

- ▶ Capacity of 84 chicken eggs, arranged in a honeycomb structure
- ▶ Compatible with BioStreamer™ HD setters
- ▶ Can be transported from farm to hatchery on pallets
- ▶ Compact and lightweight, can be held in one hand while collecting eggs
- ▶ Rigid construction
- ▶ Suitable for both small and large eggs
- ▶ Open grid providing minimum obstruction of air flow
- ▶ Suitable for automation and industrial tray washing machines

## Description

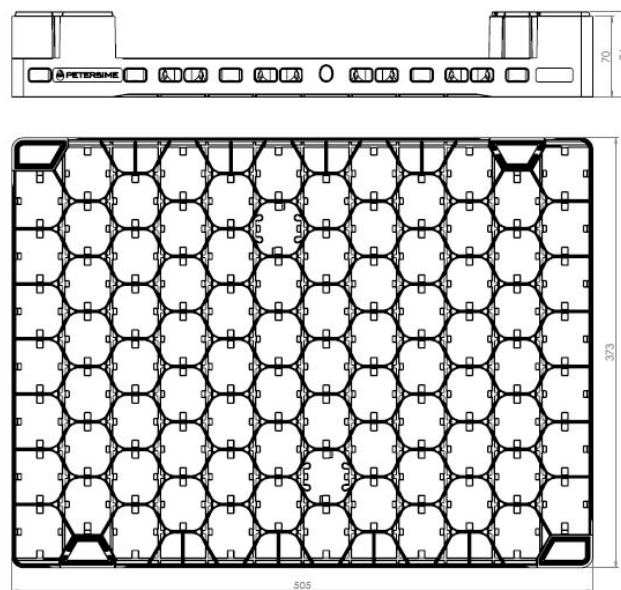

The B14839 is Petersime's stackable version of the high density, 84 egg setter tray, designed for use with Petersime's BioStreamer™ HD setters. These stackable trays can be transported from farm to hatchery on pallets.

The tray's unique honeycomb structure allows setting 12% more eggs on the same surface compared to the standard matrix-shaped trays, while maintaining an optimal air flow in the setter.

The B14839 is compact and ergonomic. Thanks to its reduced size and weight, a tray can be held in one hand while manually collecting eggs. The egg supports are designed for ideal positioning of both small and large eggs.

The tray is made of polypropylene and painted black to ensure minimum reflection of light, which enables efficient candling. It is designed for intensive handling and for cleaning by industrial washing machines.

## Specifications

### Capacity

- ▶ 84 chicken eggs

### Dimensions

Length	373 mm
Width	505 mm
Height	70 mm

### Material

- ▶ Polypropylene, black
