Description

The B15116 is Petersime's 60XL egg setter tray, designed for use with Petersime BioStreamer™, AirStreamerPlus™ and Conventional setters.

The tray's unique honeycomb structure allows setting larger eggs by using the available space more efficiently. The tray also allows an optimal air flow in the setter.

The B15116 setter tray is compact and ergonomic. Thanks to its reduced size and weight, a tray can be held in one

hand while collecting eggs manually. The egg supports are designed for ideal positioning of small, large and very large eggs.

The tray is made of polypropylene and has a black colour to ensure minimum reflection of light, which enables efficient candling. It is designed for intensive handling and for cleaning by industrial washing machines.

Specifications

Capacity

60 turkey eggs

Dimensions

Length 365 mm

Width 505 mm

Height 40 mm

Material

Polypropylene, black
