Description

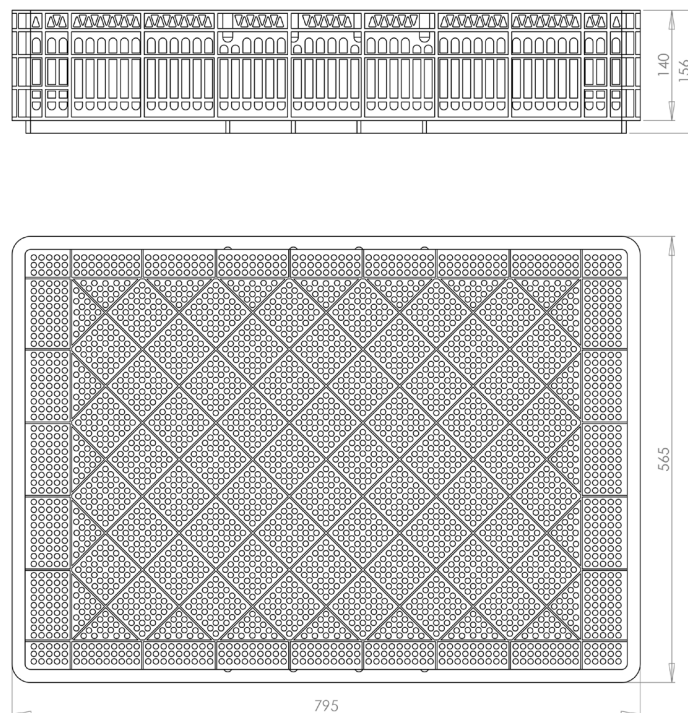

The B11225 is Petersime's hatcher basket for turkey or duck eggs. The height of the basket is increased compared to the standard hatcher basket and it has a capacity of 126 or 120 (60XL setter trays) turkey or duck eggs.

Petersime's hatcher baskets are solid but lightweight and thus easy to handle, stack, wash and disinfect. Maximum side openings ensure optimum airflow throughout the

basket. Space is provided for an identification card. The floor has ribs to prevent the eggs from rolling.

The baskets are rigid and stable, making them suitable for intensive handling. They are made of polypropylene and are designed for automatic stacking and destacking and for cleaning by industrial washing machines.

Specifications

Capacity

- ▶ 126 turkey or duck eggs
- ▶ 120 turkey (or duck) eggs when 60XL trays are used in the setter

Dimensions

Length	795 mm
Width	565 mm
Height	156 mm
