Description

The B14047 is Petersime's universal basket for chicken eggs. It serves both as a hatcher basket and as a chick transportation box; therefore, only one washing lane is needed in your hatchery.

The basket allows maximum and uniform air flow, even when stacked. It is designed for intensive handling, disinfecting and cleaning by industrial washing machines.

The ventilation holes are rounded for easy cleaning. Space for an identification label is provided on the basket by means of a sliding slot. The bottom of the basket is lifted to avoid injured chicks when the chick basket is placed on a flat surface.

Specifications

Capacity

- ▶ 75 chicken eggs, or 84 chicken eggs when used with BioStreamer™ HD hatchers
- ▶ 100 day-old chicks when used as a chick box

Dimensions

Length	596 mm
Width	398 mm
