Description

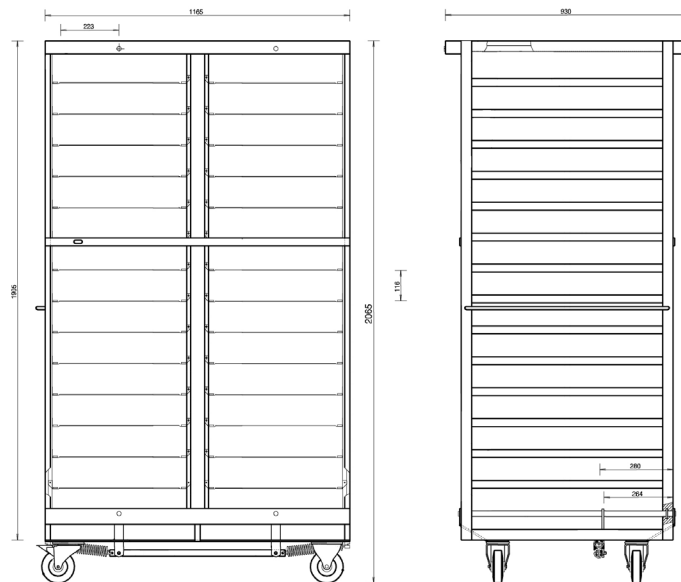

The HW067309 is Petersime's special turkey egg trolley for use in Petersimes BioS-4TS and S13 setters. It has 2 adjacent columns of 14 rows for Petersime setter trays with a capacity of 126 eggs each, adding up to a capacity of 3,528 eggs. The trolley's dimensions allow it to pass under a standard doorway.

The trolley is welded solidly and has an extra coating that protects it from corrosion. This makes it also suitable as a farm trolley, which increases the efficiency of the hatchery since one incoming egg transfer handling is eliminated.

The trolley has an ergonomic design and is mounted on four large wheels with low roll resistance for easy maneuvering. Two wheels are swivel wheels with brakes.

Petersime's setter trolleys are equipped with a maintenance free tray turning construction, consisting of a pneumatic actuator.

Specifications

Capacity

3,528 turkey eggs on 28 trays of 126 eggs

Dimensions

Length	1,165 mm
Width	930 mm
Height	2,065 mm

Material

- ▶ Welded steel frame with corrosion protective black colour coating
- ▶ Inside tray holding assembly in galvanized steel
