CHICKS
COUNT**

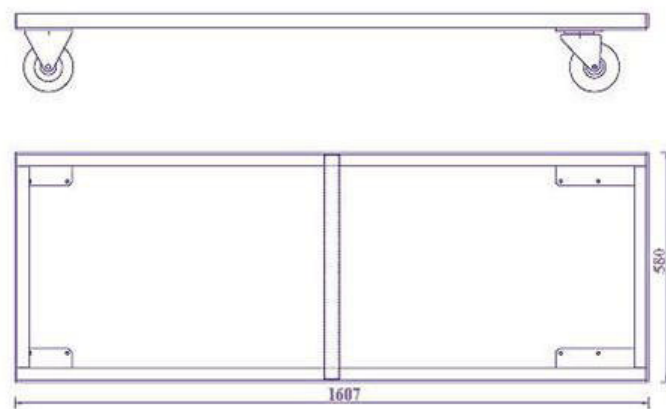

Description

The HW067099 is Petersime's standard hatcher trolley. It has a recommended capacity of two stacks of 16 chicken baskets B03952 or four stacks of 16 universal chick baskets B14047. When turkey baskets are used, the recommended capacity is two stacks of 14 baskets. This allows the loaded trolley to pass under a standard doorway.

The trolley is welded solidly and has an extra coating that protects it from corrosion. It is mounted on four large wheels with low roll resistance, two of which are swivel wheels, for easy maneuvering.

The HW067099 is suitable for industrial washing systems.

Specifications

Capacity
